Master Teaching Assistant (TA) for AY2526 S2 LIF001 Module

**Module Name**

LIF001 Research-led and Project-based Learning

**Brief Description of Activity/Course**

LIF001 is a year-long undergraduate module at XJTLU, designed for nearly 5,500 first-year students. It emphasizes interest-driven, project-based, and research-led learning, with students working in teams to explore real-world problems and develop research-informed solutions.

**Job Description**

We are seeking responsible and motivated Master-level Teaching Assistants to support the delivery and operation of this module. Master TAs will assist with class activities, tutorial sessions, project supervision, and course content maintenance. You will also play a key role in supporting students' learning progress, managing module platforms, and assisting with the implementation of teaching strategies under the guidance of LIFE instructors.

**Roles & Responsibilities**

- **Lecture and Tutorial Support:** Assist in in-class delivery and tutorial facilitation, including managing classroom logistics, preparing materials, and helping demonstrate tools or concepts.
- **Student Project Assistance:** Supervise and support multiple student project groups, helping them navigate challenges in research question development, teamwork, and project design.
- **Module Platform Maintenance:** Organize and regularly update digital content (e.g., learning materials, project guidelines, tutorial tasks) on the course platform to ensure timely access.
- **Project Progress Tracking:** Use designated software tools to help track student submissions, progress milestones, and feedback loops. Support instructors in generating simple reports on group progress or common challenges.
- **Student Consultation:** Participate in office hours or drop-in sessions to answer student questions and identify learning bottlenecks.
- **Assessment Support:** Assist teachers in organizing and preparing learning resources and students submissions, and help with marking where required.

- Other Duties: Carry out other supportive tasks assigned by teachers to enhance students' engagement and learning outcomes.

**Expected Outcomes**

- Gain first-hand experience in coordinating project-based and research-led learning in a real classroom environment. Develop hands-on experience with digital learning platforms.
- Strengthen instructional skills by facilitating tutorials, supporting lectures, and mentoring student teams through structured project development stages.
- Enhance problem-solving and critical thinking by identifying student learning challenges and providing practical suggestions to improve teaching effectiveness.
- Build cross-cultural communication and collaboration skills by engaging with a diverse student body and working closely with instructors from various academic backgrounds.
