

## Policy Recommendations for Promoting the Development of "Artificial Intelligence (AI) + Biotechnology (BT)" Innovation Clusters in Suzhou

BAI Xue, GE Yuhan, SONG Yu

### Abstract

With the rapid development of information technology, artificial intelligence (AI) has been widely applied in the biopharmaceutical industry, and the integration of artificial intelligence (AI) and biotechnology (BT) has led to an increasing number of innovations in the biopharmaceutical industry. This report starts with the analysis of status quo of innovation and integration of AI and BT in Suzhou, examines the problems and challenges faced by this industry integration, and provides policy recommendations for promoting the development of AI+BT industrial innovation clusters in Suzhou.

### Key Words

Artificial Intelligence; Biopharmacy; Biotechnology; AI+BT; Innovation Cluster
