

## The Construction of Domestic and Overseas Innovation Consortia and Its Implications for Suzhou

SONG Yu, GE Yuhan, BAI Xue

### ■ Abstract

The experience of the existing innovation consortia shows that the government-guided and leading enterprises-led innovation consortia can mobilize high-quality innovation resources within the regions more effectively and efficiently. It is also an essential way to enhance the national independent R&D strength of core technologies. This paper summarizes the construction and operation experiences of successful domestic and overseas innovation consortia, examines the current situation and challenges facing Suzhou, and puts forward policy recommendations for facilitating the construction of innovation consortia in Suzhou.
