AI Curriculum Redesign

Instructions for sharing your case

Thank you for your interest in sharing a case on **AI curriculum redesign***. Please use the template below to document a module- or programme-level redesign showing how AI was incorporated into the curriculum. You will be asked to complete five sections: video, overview, summary, about the author or team, and resources.

> **For this case collection, ***AI curriculum redesign*** refers to a purposeful change you've made to the curriculum in response to the opportunities or challenges created by AI. This may involve changes to learning outcomes, learning activities, assessment, feedback, student support or the roles of students and educators.*

What you'll submit

#	Section	What it covers	Length
1	**Video**	Presentation-style recording	Under 6 minutes
2	**Overview**	The case at a glance	3–4 sentences
3	**Summary**	Decisions, implementation, evidence, reflection	~300 words
4	**About the author or team**	Short bio with a photo	Under 150 words
5	**Resources**	Materials colleagues can adapt	As needed

1 Video *under 6 mins*

A presentation-style short video (under 6 mins) to:

1. **Context and challenge:** What module/programme was this, and why did it need to change?
2. **Before and after:** What fundamentally changed in the curriculum?
3. **How it worked:** What did students, staff and AI actually do?
4. **What happened:** Evidence, impact, one or two lessons learned and what you would do next.

> **RECORDING TIPS**
>
> You can use Tencent/Teams meetings to record your presentation. **If you are using Tencent Meeting, please remember to disable the "watermark" setting via "Security" → "Watermark settings".** You can also use video-editing software such as Camtasia. If you require additional help with recording, please reach out to your EDU representative. They will either assist you directly or connect you with the appropriate personnel for further support.

2 Overview *3–4 sentences in writing*

The case at a glance. What was redesigned, how, and why.

> EXAMPLE
> *XXX redesigned the XXX module/programme to address XXX. AI was incorporated into XXX activities and assessment so that students could XXX. XXX is an AI tool/agent used to XXX (if any).*

3 Summary *approximately 300 words in writing*

The decisions, implementation, evidence and reflection.

Please select **3–4 questions** to answer, writing approximately **100 words** for each response. You are welcome to revise or adapt the questions to better reflect your case.

1. What was redesigned, what need prompted the change, and what outcomes were you aiming for?
2. What changed from before to after the redesign? Describe the most important changes to learning outcomes, learning activities, assessment, feedback or student support. How do these elements now work together differently?
3. How was AI incorporated, and what roles did AI, students, and staff play?
4. How were students and staff supported, and how were responsible AI, access, and assessment integrity addressed?
5. What evidence was collected about student experience, learning, or programme delivery, and what did it show?
6. What did you learn, what will you change, and what advice would you offer colleagues?

4 About the author or team *a short bio with a photo, under 150 words*

Include the Pure link if you would like.

5 Resources

Please share resources that will help colleagues adapt the redesign, such as a curriculum map, learning activities, AI agent or prompt guidance, before-and-after curriculum, assessment briefs and rubrics, student guidance, or evaluation instruments. Please indicate any restrictions on reuse or sharing.
