Feature Analysis of the Nobel Prizes in Economic Sciences: Suggestions on Training Top Economists in Suzhou

Zhenxiong Li

█ Abstract

This report reviews the history of the Nobel Prize in Economic Sciences and analyzes the characteristics of the laureates over the past 50 years in terms of research field, age, nationality, and institutional background. Based on these feature analyses, this report suggests that Suzhou can explore various practical methods of training world-class economists from the aspects of basic education, university construction and talent support.
