

Promoting High-level Modernisation of Provincial Governance: Practices of Rural Digital Governance in Zhejiang

XU Xuchu, MA Xiangyuan, WU Bin, JIN Jiandong

Abstract

In recent years, embracing the digital wave, Zhejiang province has initiated construction of digital countryside in an effort to comprehensively promote digital transformation of rural governance, lay a solid foundation for boosting high-level modernisation of provincial governance, and improve areas of weakness, thus building a moderately prosperous society in all respects. There has been a string of successful cases of rural digital governance across Zhejiang province. Drawing on practices of rural digital governance in Zhejiang, this report summarises mechanisms, approaches, problems, and solutions of rural digital governance, which will be of benefit to advancing the development of rural digital governance in China.
