

Exploring the Construction of Whole Biopharmaceutical Industry Chain: Boston Experience

BAI Xue, GE Yuhan, SONG Yu

■ Abstract

Since the 1970s, the Greater Boston area of the US has developed into the world's largest biopharmaceutical innovation area, taking an important position in the global biopharmaceutical industry. This report analyses the important sectors and key nodes of the whole biopharmaceutical industry chain in Boston, and focuses on five aspects including fundamental research, applied research, pilot and clinical trials, manufacturing, sales and services, in order to provide a valuable development path for the construction of China's biopharmaceutical industry.

■ Key Words

Biopharmaceutical Industry; Construction of Whole Industry Chain; Boston Experience
